

BEN HUDNALL MEMORIAL TRUST

Degrees & Certifications

Over the next decade, it is anticipated that 65% of all jobs in the economy will require postsecondary education and training beyond high school. More importantly, in healthcare, 83.5% of jobs will require at least an associate's degree.

Online degree programs are very popular today as adult learners are finding convenience by studying on their own schedule while continuing with their careers. Whether your employees are returning to college to better themselves, to advance in their current role, to begin a new career, or just to make a life-long dream come true, [Coastline Community College \(CCC\)](#) is here to help.

Finishing your degree is more than a personal achievement; it's an accomplishment that can open doors for greater opportunities. The Degree Completion Program is designed for those who have already completed some college-level coursework (perhaps from a variety of academic institutions) who would now like the opportunity to turn that collection of classes into an associate's degree.

Why is this a good program?

With Coastline, you can:

- Get their associate's degree anytime, anywhere.
- Choose from over 30 AA/AS Degree options.
- Transfer credits from their Ben U classes for a ***no out-of-pocket expense*** experience.
- Transfer their completed AA/AS Degree to a variety of 4-year institutions *without* bringing along any student debt.

Now is the time to invest in your future. Together, we can help them head back to school!
